

ONE STEP ACID WASH

Product Description:

San Guard-61 is a new innovative highly concentrated antimicrobial “One Step Acid Wash” and final rinse of feed/food contact equipment and barn/pen wash. When used properly it eliminates hazardous caustic from wash step, hazardous acids and numerous rinses saving the producer time, water, energy & labor. The combination of Ike-Joe and hydrogen peroxide (FDA GRAS ingredients) makes for a very safe and effective product for the farm and animal care industry. San Guard-61 is non-toxic and non-hazardous. San Guard-61 is produced following Current Good Manufacturing Practices (CGMP). San Guard-61 can be easily implemented through current CIP injection systems or diluted through SCGS dispensers to proper strength.

San Guard-61 - has been lab tested against the below organisms with very positive results:

- e.coli, salmonella, mycoplasma bovis, cryptosporidium, listeria, staph. Aureus, Strep. Uberus

BENEFITS:

- Eliminate hazardous chemicals from site
- Reduce CIP time
- Reduce energy
- Reduce water
- Reduce equipment ware
- Reduce SPC if used properly
