Purina® Grower 16

Guaranteed Analysis:

ACTIVE DRUG INGREDIENTS

Decoquinate ....0.0015 %
(6.8 mg/lb)

NUTRIENT	LEVEL
Crude Protein, (Min) 16.00%	
This includes not more than 1.5% equivalent crude protein from non-protein nitrogen	
Crude Fat, (min)...2.00%	
Crude Fiber, (max) 16.00%	
Acid Detergent Fiber (ADF) (max)................................22.00%	
Calcium (Ca), (min) 0.75%	
Calcium (Ca), (max) 1.25%	
Phosphorus (P), (min) 0.50%	
Salt (NaCl), (min).. 0.50%	
Salt (NaCl), (max)... 1.00%	
Copper (Cu), (min) ....22.00 ppm	
Copper (Cu), (max) ....27.00 ppm	
Selenium (Se), (min)... . 0.30 ppm	
Vitamin A, (min)...5,000 IU/lb	

Ingredients:

Processed Grain By-Products, Grain Products, Roughage Products, Plant Protein Products, Molasses Products, Forage Products, Calcium Carbonate, Salt, Ammonium Chloride, Lignin Sulfonate, Colored with Iron Oxide, Dicalcium Phosphate, Monocalcium Phosphate, Sodium Selenite, Vitamin D_3 Supplement, Vitamin E Supplement, Vitamin A Supplement, Zinc Oxide, Cobalt Carbonate, Manganese Sulfate, Ethylenediamine Dihydroiodide, Zinc Sulfate, Basic Copper Chloride.

Directions:

Administer as a top dress supplement or mix into the daily ration to provide 22.7 mg per 100 pounds of body weight per day. 3.34 pounds of this supplement will medicate 100 pounds of body weight. Feed at least 28 days during period of exposure to coccidiosis or when it is likely to be a hazard.

Important:

1. Start kids on colostrum milk from birth to 3 days of age; feed Purina® Doe's Match® Kid Milk Replacer from 2 days until 4-8 weeks of age.
2. If kids have not been creep fed or they were purchased, then they should be placed on grass hay on a free-choice basis after arrival.
3. When making a ration change, allow 3 to 5 days for animals to adjust to the new ration.
4. Keep a constant supply of complete feed available. Do not let fine material accumulate in feeders.
5. Provide adequate bunk space for each animal. Bunks should be well-protected and well-managed to prevent feed from becoming wet or moldy.
6. Provide a source of fresh, clean water at all times.
7. Feed Purina® Goat Mineral free-choice.
8. Consult your veterinarian for the recommended health program for your local area. This includes internal and external parasite control. In groups of goats there are certain animals that experience chronic bloat, or other digestive disturbances and consequently, are poor performers. In addition, excess feed consumption, severe weather changes resulting in erratic feed consumption and poorly managed feeding practices, can increase the incidence of bloat in all goats. If bloating occurs, the above management practices should be reviewed and your veterinarian consulted.

Caution:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death.

This product contains copper and should not be fed to sheep. Bentonite should not be used in decoquinate feeds.

USE ONLY AS DIRECTED.
