SU-PER[®] Lyte

Helps Maintain Normal Body Fluid Levels!

Provides balanced electrolytes to replace those lost during exercise or competition. Buffered electrolytes and trace minerals. Replaces lost electrolytes. Oral electrolyte and trace mineral supplement for horses during periods of high heat, hard work, training, or physical activity.

Electrolytes are an important tool to ensure your horse stays healthy and hydrated. Just like people, horses lose body fluids in periods of high heat, training, or physical activity in general. Along with the loss of water, they also lose electrolytes themselves, which need to be replenished.

Electrolytes help support normal nerve and muscle function, as well as nearly all other physiological functions in the body. Low levels of electrolytes or an imbalance in these nutrients can cause serious problems for your horse. Since electrolyte needs are rarely met in the diet itself, especially for active horses, an electrolyte supplement can be essential in the replacement of lost nutrients, and aid in proper hydration.

SU-PER[®] Lyte is an apple flavored, salt-based electrolyte that contains the proper ratios of essential electrolytes and trace minerals to replace those lost during exercise and/or hot conditions.

We offer **SU-PER[®] Lyte** in a reduced-dust powder to be top-dressed on the horses feed daily, or as a paste which can be given when needed during travel, competition, trail rides, or anytime you need to administer quickly.

SU-PER[®] Lyte is an inexpensive way to guard against dehydration and maintain electrolyte balance, even in challenging conditions.
