Down2Earth[®]

DIATOMACEOUS EARTH

Food Grade* with no added chemicals

INGREDIENTS

100% Diatomaceous Earth

FOR USE ON

To be used for various livestock, equine, dog, rabbits, and swine species including:
Bovid: Beef, Bison, Dairy, Deer, Goats, Sheep, etc. Camelids: Alpacas, Llamas, etc.
Poultry: Chicken, Duck, Emu, Goose, Ostrich, Pigeon, Quail, etc. Rodents: Chinchillas, Gerbils, Guinea Pigs, Hamsters, etc.

PACKAGING

1 lb bag, 10 bags per case

UPC# 7-45801-10629-1

2 lb shaker jug, 9 shaker jugs per case

UPC# 7-45801-10631-4

5 lb bag, 6 bags per case

UPC# 7-45801-10633-8

Durvet's Down2Earth[®], the diatomaceous earth (DE) product that's the perfect mineral for animal feed blends.

Our Food Grade* diatomaceous earth (DE) powder, Down2Earth[®], is 100% DE.

The high absorption capacity of Down2Earth[®] DE makes it an ideal blending agent for use in animal feed to eliminate clumping, especially with bulk storage and transfer applications.

It's an inert carrier and an effective anti-caking additive for animal feed. Use up to 2% by weight in manufactured feeds, or as an additive in daily feed rations.

What is Down2Earth Diatomaceous Earth?

It is a naturally occurring mineral found in pre-historic freshwater lake beds and is of the highest quality. Diatomaceous Earth (or DE for short) is a non-metallic mineral comprised of the fossilized remains of single-celled aquatic life referred to as diatoms. (Similar to algae.) These diatoms lived millions of years ago in freshwater lakes. Over time their skeletal remains fell to the bottom of the lake bed and accumulated there. These accumulations have been preserved over time and are now refined and converted into numerous different products with a myriad of various uses. Durvet's DE is mined and processed right here in the U.S.A.

* Meets U.S. Food Chemicals Codex Standards.
