

nfz™ puffer

Indications:

For treatment of eye and ear infections in dogs and cats.
Also indicated for treatment of surface wounds, cuts, and abrasions.

Approved For Use On:

Dogs and Cats

Composition:

Contains 0.2% Nitrofurazone in a water-soluble base.

Directions for use:

SHAKE OR ROTATE TO LOOSEN POWDER

FOR EYE INFECTIONS IN DOGS AND CATS -

Remove cap and squeeze container to force a stream of powder directly into the eye. Repeat treatment daily. If there is no improvement after 4 days, a new diagnosis should be made or a veterinarian consulted.

FOR EAR INFECTIONS IN DOGS AND CATS -

Clean out inside of ear and ear canal with cotton pledget. Prepared cotton swabs, which may be obtained at any drug store, are best for cleaning out the ear canal. Insert nozzle of container into ear canal and squeeze twice. Repeat daily until improvement is noted.

FOR SURFACE WOUNDS, CUTS AND ABRASIONS -

Apply daily until danger from infection is eliminated or until healing takes place.

CAUTION: Federal Law prohibits the use of this product in food producing animals.

HUMAN WARNINGS: Carcinogenesis: Nitrofurazone has been shown to produce mammary tumors in rats and ovarian tumors in mice.

Packaging:

1.59 oz., 12 per case , UPC# 7-26087-12674-6
