

Blueprint® Lamb Grower is a complete, palatable mini pellet designed to develop a lamb's skeletal composition and achieve marked gain prior to weaning and after entry into the feedlot or replacement pen.

ABOUT THE PRODUCT

Blueprint® Lamb Grower is manufactured as a mini pellet to assure every mouthful of feed is like the previous bite. This product is formulated for elevated feed intake to promote healthy, sound rumen development and to expand rumen function and capacity. This feeding practice will equip lambs for success during the growing and thru the finishing phase of production.

As part of the Blueprint program, the Alltech technologies in this product promote digestive, immune and urinary system health. These products include Bioplex®, a source of organic trace minerals (cobalt, manganese and zinc), and Sel-Plex®, a selenium yeast. Blueprint organic trace minerals resemble those found naturally in plant proteins. This translates to increased availability with less interference by antagonists and less oxidative stress, which, in turn, improves performance.

Blueprint Lamb Grower also contains Bio-Mos® 2, a cutting-edge technology for gut health that enhances bacterial diversity and is helpful when animals are experiencing stress or going through transition periods.

FEEDING DIRECTIONS

BLUEPRINT® LAMB GROWER 16%: Start feeding Blueprint Lamb Grower 16% when lambs are 4 weeks of age and continue until lambs are 13 weeks of age or after weaning whichever is later. Feed at the rate of 1.1 to 5.1 pounds per head per day. It is recommended that lambs be vaccinated for Types C and D enterotoxemia (overeating disease). A clean, fresh source of drinking water is also necessary.

BLUEPRINT LAMB GROWER 16% B30: Blueprint Lamb Grower 16% B30 is a complete feed for lambs from 50 to 80 pounds. Feed continuously at the rate of 1.0 to 4.6 pounds daily to provide not less than 15 nor more than 70 milligrams of Lasalocid per day. Feed no other grain or roughage once lambs are accustomed to the feed. Lambs should be switched over to this feed gradually to prevent initial over consumption. Keep Hubbard Sheep Mineral, salt and water available to lambs at all times.

BLUEPRINT LAMB GROWER 16% D22.7: Blueprint Lamb Grower 16% D22.7 is a complete feed for lambs from 50 to 80 pounds of body weight. Feed continuously at the rate of 1.0 pound per 100 pounds of body weight to provide 22.7 milligrams of Decoquinatone per 100 pounds of body weight. Feed at least 28 days during periods of exposure or when experience indicates that coccidiosis is likely to be a hazard. Provide a constant supply of clean, fresh water.

GENERAL GUIDELINES

No additional copper was added to this product. This product can be fed as part of a grain mix self-fed or in combination with forages to lambs thru the grower phase of production.
